TUMI ANNOUNCES DRILL PERMIT APPROVED FOR VITTURN IN SWEDEN

Vancouver, Canada – Tumi Resources Limited (the “Company”) (TSXv-TM; OTCBB – TUMIF; Frankfurt - TUY). David Henstridge, President, is pleased to announce that a drill permit has been approved for an initial drill program to be undertaken at the Vitturn project in Sweden. Vitturn 1 and 2 concessions are located at the northern end of the Stollberg mineral fields where numerous old base metal and silver mines occur along a north-south trending belt over a distance of 12km. Some of these mines are over 750m deep.

The Company recently completed an induced polarization survey to test the Company’s theory that the favourable mineral horizon extends northwards under till cover into Vitturn 1 and 2. An independent geophysicist has interpreted the results on behalf of the Company and has reported: “the data quality for the survey is of a very high standard with both the observed resistivity and chargeability data very coherent. The most obvious feature delineated by the data is the coincident high chargeable-low resistivity body that strikes in NNW orientation for approximately 400m. The correlation of the elevated chargeability and the low resistivity, with the good levels of data quality and the high coherency of the chargeability decays makes this a priority anomaly”. The chargeability anomaly map may be viewed on the front page of the Company’s website www.tumiresources.com.

The Vitturn licences abut Lundin Mining’s Tvisbo claim to the north: Lundin has completed geophysical surveys and drilling and have publicly stated that they have intersected resource-grade sulphide mineralization within this claim.

Mr Henstridge stated: “The proximity of this 400m long geophysical target to known resource-grade mineralization make it a high priority drill target for Tumi. Now that a drill permit has been approved an initial drill program will be scheduled as soon as practicable”.

The qualified person for Tumi’s projects, David Henstridge, has visited the Vitturn project area in the Bergslagen District of Sweden and has verified the contents of this news release.

On behalf of the Board,

“David Henstridge”

David Henstridge, President & CEO
