**Dr. John L. Faessel
in his 'On The Market'
commentary today:**

- "If you missed the boat early on Ivanhoe Mines Inc* (IVN) - Mosquito [at its flagship CUMO Project in Utah] has compelling parallels; this story has legs and legs and legs!
- Staggering numbers comparable to of the world's largest mining ventures"

**[Click here for Dr. Faessel's

Dear Friends:

Yes, "The Mosquito Story has legs and legs"

This week I and my family bought some more shares in Mosquito. The Company certainly has reached world-class status and is attracting investment worldwide at an accelerated pace.

If you have not already done so then start your research and due diligence this weekend by going to www.mininginteractive.com.

**You've Got to be in it to Win it - - - and this one is a winner!
As always - - - Stay Tuned!!**

• Mosquito has a diverse portfolio of precious and base metals projects in North America and Australia. The Company is well financed, no debt, holds four molybdenum projects in the United States and is well diversified with multi-element projects including significant gold plays. The Company has reached world-class status and attracting investment worldwide. Its primary focus is development of its giant CUMO Molybdenum and Copper deposit, NI 43-101 resource in Idaho.

-- Brian McClay, Mosquito President & CEO

"With CUMO, it is our goal to have the lowest cost, large-scale producing molybdenum mine in within a five and six year time frame. We expect to initially mine at a rate of about 125,000 tons of ore per day containing molybdenum, copper, silver, rhenium and tungsten. We are aiming to produce molybdenum at about \$3/1b, and if we anticipate \$15/1b molybdenum (prices), that is clearly economic. We will be the lowest cost producer, primary producer, mainly because of the size of the deposit and consequent economy of scale. "
